# Vikan Microfibre Glove, 260 mm, Grey

The Vikan hand glove is suitable for cleaning any hard surface and is often used on stainless steel hand rails. When used dry, microfibres pick up dust, dirt and hair using static electricity. When damp, the glove loosens dirt and grease.

Wash the products as soon as possible after use - to reduce the risk that dirt becomes ingrained with stains and odors as result.

First wash should be done at minimum 60 ° C and separately to avoid staining

Wash cloths and mops of various types separately, to avoid contaminating each other with lint.

Pre-rinse in cold water with frequent water change, no added chemicals - in order to remove any chemicals that can have been used for cleaning and may interfere with or cause a negative impact on the fabric at higher temperatures in the washing process

Use Dry or Damp
