UltraSpeed Pro

High-performance mopping the easy way

Faster, cleaner, easier.

Still mopping the slow, old-fashioned way? Still struggling with heavy vertical mops or out-dated flat mops? Facing problems with poor hygiene, low cleaning performance and heavy handling?

Then it's time to switch to the future of flat mopping. UltraSpeed Pro – the most up-to-date and best performing bucket-and-press system on the market.

Demands on effectiveness, cost per square meter, ease of handling, staff training is constantly increasing. Have you done your maths lately?

Whatever the cleaning requirements, UltraSpeed Pro will dramatically raise your standards in speed, performance/costs, versatility and ergonomics.

Unbeatable performance

Compared to current bucket-and-press systems, UltraSpeed Pro outperforms them in every aspect.

- Clean over 750m²* per hour single step or 360m²** two step
- Faster wringing – simple to use and twice as fast***
- Efficient press – releases up to 50% more water***
- Floors dry faster – reduce slip hazards
- Latest microfibre mops – better dirt removal
- Hygienic – no hand contact with mops or cleaning solution
- Easy to use – no training required
- Ergonomic – lightweight, no bending to wring
- Compact – small footprint for space saving storage
- Versatile – single and double bucket, optional push bar

Systems for all your needs

The UltraSpeed Pro range includes options to suit all sites, starting with the single bucket system for general floor cleaning. Add a second bucket onto the chassis and you have a double bucket system for mopping larger areas.

If you want to fulfil more cleaning tasks you can use the second bucket to carry chemicals, cloths, paper etc.

To simplify the choice we have created three kits:

1. **System:** contains the basic system – chassis, bucket(s) and press
2. **Starter:** containing the basic system plus mop frame and mop pad
3. **Ready to Go:** containing the starter kit plus a telescopic mop handle

All solutions are available with an ergonomic push bar that makes moving the system around sites simple and can be used with a choice of microfibre mops as well as specialist mops for cleaning safety floors.

UltraSpeed Pro

– the flexible choice is yours!

* Calculations based on figures from Figr (an independent German research and testing institute for Facility Management)

** Figures from Figr

*** Compared to leading flat mop bucket and press systems

Second bucket

Convert from single to double bucket method. Can be used to carry cloths, chemicals etc. Easy to remove.

High back

For easy entry of mop

Patented press

Fastest and most efficient press on the market.

Easy to use, durable press

No gears or complicated mechanism that can break.

Integrated handle holder

Holds mop frame and handle in place.

Clamp wings

Easy fixation and removal of the press.

Hand grip

For easy carrying.

Space for additional mops

Second mop or dustmop can sit on the back.

Small and compact

Measures 56cm x 38cm (0.28m²)
Easy to store after use.

Push bar

Optional push bar, just remove the cap and insert push bar.

Large foot pedal, easy opening

Easy to step on. Stays open when pedal is pressed.

Second bucket can be used to carry cloths, chemicals etc.

Hand grip for easy carrying.

A second mop or dustmop can sit on the back or the system.

Optional push bar for easy transportation.

SafeMop designed for cleaning safety floors.
